

FOLEY MAINTENANCE PLANS

OUR BUSINESS IS KEEPING YOUR BUSINESS RUNNING.

YOUR MACHINE. YOUR BOTTOM LINE. **OUR JOB.**

The best intentions often give way to other priorities... like making money. This is especially true of machine maintenance. But forgoing maintenance can cost you long-term.

Foley Equipment can provide service in a more timely, efficient and cost-effective manner. You save time, improve machine uptime and availability and have more resources to concentrate on other important aspects of your business.

Regardless of what Cat® equipment you own, their ages or their applications, a Foley Maintenance Plan (FMP) guarantees timely, expert service to keep you on the job.

THE KEY FEATURE IS FLEXIBILITY.

Foley Maintenance Plans are customized to fit your business needs, your equipment and your applications. There are no pre-set requirements or specific services. Instead, we'll analyze how you work, where you work and the extent of your service capabilities to determine the type of FMP that is right for you.

Another important benefit of every Foley Maintenance Plan is the exclusive use of genuine Cat parts and maintenance products. They're your guarantee of quality, performance and value in all of your equipment service.

Always the best products

Foley offers three basic plans to which options can be added based on your specific needs:

"DO IT MYSELF" The basic plan includes the required liquid filters, oil and oil samples for you to perform services at 250 hour intervals. An optional plan provides the required liquid filters and oil samples to perform for the 250 hour interval service but does not include oil or labor to perform any services.

Additional options for these plans include Quick Evac unit, 250 or 500 hour oil change interval options, dry filters, hydraulic oil and coolant.

"WORK WITH ME" This plan provides you with the required filters, oil and samples to complete the 250 and 500 hour service intervals while Foley will provide the required filters, oil, samples and the labor to perform the 1,000 hour services. Included with the 1,000 hour intervals you will receive a comprehensive machine inspection with each visit.

"DO IT FOR ME" Foley provides all of the required liquid filters, oil, samples and labor on each of service interval. This includes a comprehensive machine inspection at the 1,000 hour intervals plus a basic inspection with the other Foley performed services.

Additional options for the above plans include Quick Evac unit 250 or 500 hour oil change interval options, dry filters, hydraulic oil and/or coolant change, valve lash adjustment and circle adjustments on Motor Graders including labor during a Foley provided service interval.

TAKE THE FIRST STEP

A visit with your Foley Product Support Sales Rep is the first step in determining what sort of FMP might best fit your needs. They can guide through the analysis of the operating environment for each machine and develop a personalized maintenance plan to maximize the uptime and money-making potential of your equipment.
